Re Item V

**Reasoned statement with regard to novelty, inventive step or industrial applicability;
citations and explanations supporting such statement**

1) Reference is made to the following documents:

D1: WO 03/024243 A

D2: US 2003/224100 A1

D3: US-A-5 436 022

2) Novelty Art 33 (1) and (2) PCT

The subject matter of independent claims 16, 25 and 26 is not regarded as novel since D1 to D3 anticipate a tomato concentrate. The method of manufacturing such a product does not appear to confer to the products of claims 16 and 25 any distinguishing technical features. Moreover, the use of the said product as a condiment is also known from the cited documents.

The subject matter of dependent claims 21, 22, 27 and 28 would be regarded as novel only in relation with an independent claim fulfilling the requirements of Art. 33 (1) and (2) PCT.

3) Inventive step Art 33 (1) and (3) PCT

The problem to be solved consists in improving organoleptic quality of tomato based product, by adjusting the insoluble solids / insoluble solids ration in the final product. The solution to the problem to be solved consist in using conventionally manufactured tomato concentrate, adding water and separating water and concentrate by solid-liquid separation under stirring.

The closest prior art is D1 relating to tomato concentrate obtained by separating tomato product into 2 stream of different viscosity, concentrating the portion with the lowest viscosity and combining the two portion. The said document differs from the present application in that it does not disclose the addition of water to a concentrate having a solid residue of more than 15%, followed by liquid separation using a solid-liquid apparatus. D1 uses a decanter in order to obtain two fractions and further treat them individually for concentration.

The solution provides an improved process for manufacturing tomato concentrate, wherein the insoluble solids / soluble solids ratio is adjusted by the manufacturing method to obtained desirable properties.

The subject matter of claims 17-20 and 23 are regarded as fulfilling the requirements of Art 33(1) and (3) PCT since the amount of insoluble solids and soluble solids solve the problem of improving taste of tomato based concentrates and was not suggested by the prior art.

The subject matter of claims 24 and 29 would be regarded as involving an inventive step only in relation with an independent claim fulfilling the requirements of Art. 33 (1) and (3) PCT.
